

### ePCR

BCEHS has been working hard to develop an ePCR system that meets our needs for reliability, quality and functionality and can integrate with existing systems in hospital emergency departments. Unfortunately, the vendor was unable to meet our business requirements. IMIT is working with senior leaders to develop a 90 day action plan to outline next steps and commit to sharing the decision with staff by the end of October. Thank you to the staff who worked on the project so far. Your input was invaluable and the time you committed to the project is very much appreciated.
